

## Vdips-Sense 61000-4-11 Verification Jig

The Vdips Sense has been developed with EMC test laboratories in mind to enable a “go / no-go” verification of the Voltage Dip generator output prior to test. The Vdips Sense measures duration of interruptions on the mains supply from 2 ms up to 20 s . This gives a very quick repeatable check to ensure that the generator is operating as intended prior to commencement of test.

Overall Dimensions	<ul style="list-style-type: none"><li>• Height 150 mm</li><li>• Width 90 mm</li><li>• Length 65 mm</li></ul>
Power	<ul style="list-style-type: none"><li>• 9V Alkaline PP3, approximately 2 hours continuous use</li></ul>
Input Voltage	<ul style="list-style-type: none"><li>• 220-250V 50/60Hz</li></ul>
Output Reading	<ul style="list-style-type: none"><li>• Interruption duration in ms (2 to 20000)</li></ul>
Connections	<ul style="list-style-type: none"><li>• Shrouded 4 mm Banana Plug sockets</li></ul>
Warranty	<ul style="list-style-type: none"><li>• One year, return to manufacturer</li></ul>
